PROFESSIONAL SUMMARY

I am a software engineer with over 5.5+ years of experience in .Net Core, C#, SQL, Angular, and Microservices. I Specialize in backend development, API design, and database optimization and have worked on various domains including Collage Management System, Hospital Management System, Document Management and Citizen Centric. I enjoy solving complex problems, optimizing performance, and implementing scalable solutions.

TECHNICAL SKILLS

Frontend:	Angular (v16-v20), React.js, RxJS, JavaScript, jQuery, AJAX, Razor Pages
Backend & Security:	.NET Core 10/9/8/7, ASP.NET MVC, C#, EF Core, Dapper, LINQ, ADO.NET, Window Services, Auth0, MFA, JWT, SSO
Database:	MS SQL, MY SQL
Architecture & Patterns:	Microservices, N-Tier Architecture
Cloud & DevOps:	AWS (EC2, S3, SES), Azure (DevOps, Blob), CI/CD (CodePipeline, GitHub Actions), IIS, Docker, Kubernetes
Tools & Observability:	Auto Mapper, Quartz, Serilog, SonarQube, Sentry, Github CodeQL, Power BI, Postman, Git, Azure Boards, JIRA
AI Productivity:	GitHub Copilot, Cursor, Claude AI, ChatGPT, OpenAI API
Professional Competencies:	Effective Communication, Team Collaboration, Analytical Thinking, Problem Solving, Time Management
Certifications:	AWS Solutions Architect - Associate (SAA-C03, In Progress)

WORK EXPERIENCE

Omninet Technologies, Lucknow

Software Engineer, Full Stack

July 2023 – Present

- Designed and implemented the LU Exam Post system to streamline result processing at Lucknow University.
- Developed automated result computation and grading mechanisms to ensure accuracy and efficiency.
- Configured student and faculty portals for seamless access to results and academic records.
- Integrated online exam form submission and hall ticket generation to optimize the examination process.
- Enhanced security protocols, including encrypted login and role-based access control for result verification.
- Implemented real-time notifications and updates regarding examination schedules and result announcements.
- Enabled faculty dashboard functionalities to simplify evaluation, result validation, and grade corrections.
- Established a dedicated helpdesk support system to assist students and faculty with queries and issues.

Stack: Angular 20 | .NET Core 10 | MSSQL | Dapper | EF Core | JWT | Auth0 | ASP.NET MVC | Serilog | Window Service | IIS | SVN | GitHub

Fiabes Solutions Private Limited

Software Engineer, Full Stack

Oct 2021 – July 2023

- Diagnosed and resolved database and software performance issues.
- Conducted vulnerability patching and mitigated system weaknesses through thorough investigation.
- Addressed hardware and software compatibility challenges, ensuring seamless interface design.
- Monitored database performance to maintain smooth workflow operations.
- Managed analysis, design, and testing phases of the software development life cycle.
- Collaborated with customers, managers, and end-users on complex projects.
- Designed, developed, and optimized new web and database applications.
- Tuned systems for enhanced performance and efficiency.
- Implemented engineering best practices to deliver high-quality, scalable solutions.
- Developed database architectures and table structures for web applications.

Stack: Angular 12/16 | .NET Core 6/7 | MYSQL | Dapper | EF Core | JWT | ASP.NET MVC | Serilog | GitHub

Soft One Global, Lucknow

Software Developer

Mar 2021 – Sep 2021

- Troubleshoot and resolve performance issues for databases and software.
- Corrected, modified and upgraded software to improve performance.
- Analyzed work to generate logic for new systems, procedures and tests.
- Built databases and table structures for web applications.

Mecatredz Technology, Lucknow

Apprenticeship Trainee

Sep 2020 – Mar 2021

- Collaborated with team members to complete code projects on-time.
- Partnered with team members to learn best practices in software design.
- Worked with developers to identify and remove software bugs.

KEY PROJECTS

LU_Exam_Post (Lucknow University Result Processing System)
Team: 4 | Domain: Lucknow University

July 2023 – Present

LU Exam Post is an advanced result processing system designed for Lucknow University to streamline the examination and result declaration process. It ensures accuracy, efficiency, and transparency in handling student results, grading, and performance evaluation.

- Developed and deployed LU Exam Post (Lucknow University Result Processing System) for efficient result management.
- Designed and implemented student master, course master, subject master, paper master and examination master modules.
- Configured system parameters for seamless integration with university databases.
- Automated result processing workflows, including grading, re-evaluation, and supplementary exams.
- Enabled dynamic result publishing and approval configurations as per university policies.
- Integrated error-checking mechanisms to minimize result discrepancies.
- Designed and implemented exam scheduling modules supporting multiple exam formats.
- Developed customized report generation for scorecards, transcripts, and analytics.

Stack: Angular 20 | .NET Core 10 | ASP.Net MVC | MSSQL | Dapper | EF Core | JWT | Auth0 | Serilog | Window Service | SVN

Citizen Centric Portal
Team: 6 | Domain: Karnataka State Police

Duration: 12 Months

It is a web based application which is design and developed as Online Citizen Centric Portal. Portal to manage all the citizen related queries like senior citizen registration, locked home information, eFIR, vehicle theft information.

Stack: Angular 14 | .NET Core 6 | MYSQL | Dapper | EF Core | LINQ | JWT | Quartz | Serilog | Git | IIS

Document Management System
Team Size: 6 | Domain: Document Management

Duration: 6 Months

It is a web based application which is design and developed as Document Management System.

Stack: Angular 13 | .NET Core 6 | MYSQL | Dapper | EF Core | LINQ | JWT | Serilog Quartz | Git IIS

docEDGG (Hospital Management System)
Team Size: 6

Duration: 12 Months

HMS - (Hospital Management System) to manage all manual tasks i.e. patient registration, appointments, doctor consultation, medical records, pathology, day care, ICU, OT through software, it's integrated system connecting patient's present to all the departments, its highly secure and managed system. Here we ensure 0% financial loss of hospitals from patient side. Event based SMS and Email feature to share the information with the senior management. In short Complete Hospital Automation.

Stack: ASP.NET MVC | MYSQL | EF Core JQUERY JSON AJAX | LINQ | JWT | Serilog Quartz | IIS

EDUCATION

Master in Computer Applications - Computer Science And Programming
Integral University - Lucknow, India

June 2025 - Purssing

Bachelor in Computer Applications - Computer Science And Programming
Integral University - Lucknow, India

Aug 2022 - June 2025

3 Year Diploma - Computer Science & Engineering
Government Polytechnic Jaunpur, India

Jul 2017 - Jun 2020
